Drum Heater For Foodstuff and pharmaceutical products

High temperature drum heaters specially designed for the food and pharmaceutical industries. The drum heater is the perfect product for heating up fluids to a high temperature in a metal drum.

With this drum heater it is easy, fast and absolutely safe within regulations to heat up fluids to a desired temperature - all the way to 120°C of course depending on the fluids maximum temperature.

This heater is equipped with 2 thermostats that with precision can heat the drum from 0 - 120°C.

These drum heaters are designed in special silicone materials that complies to the industries rules and regulations so that the silicone does not store bacteria but works optimal and safe for food hygiene.

The materials are furthermore very durable and together with the webbing straps are easy to attach the heater to the drum. This also makes the drum heater perfect to use when transporting drums that must keep a certain temperature or viscosity.

Technical description

- Silicone/Glass fabric jacket.
- Glass filament blanket.
- Silicone insulated spiral Wound resistance element.
- Adjustable quick release webbing straps.
- Standard size 200 Litres
- 10ft power cable.
- Thermostat 0-120°C.
- IP54 Protection.
- Warm-up duration approx. 24h (200 L water from +15°C to +80°C with a 1200 W drum heater).
